

Low Level Castors

Single Wheel Castors

A comprehensive range of high load to height ratio castors for use in applications where a low working height is desirable.

XSH Series

KF Series

Twin Wheel Castors

2SL and 138 Series castors offer exceptional load capacity in relation to their low overall working height. Ideal for heavy equipment being used on smooth flooring and only requiring occasional movement. The differential action from the twin wheels makes for a smooth action.

Wheel Dia. (mm)	Tread Width (mm)	Load Cap. (kg)	Overall Height (mm)	Fitting Dimensions (mm)			Wheel Type	Bearing Type	Swivel Radius (mm)	Catalogue Reference	
				Plate	Hole Ctrs	Bolt to fit				Swivel	Fixed
138 Series (Antistatic wheels are available on these - Contact Sales with your requirements)
